BIO

Fanny Reynaud is a cinematographer who graduated from ECAL (Switzerland) in 2020. After training alongside renowned cinematographers such as Agnès Godard AFC and Josée Deshaies, she began her career as a camera assistant on several feature films, including *Thunder* by Carmen Jaquier, *Cosmos* by Germinal Roaux, and *Presque* by Bernard Campan & Alexandre Jollien.

At the same time, she shot the cinematography for numerous fiction short films before joining her first feature film as B-camera operator on *Bisons* by Pierre Monnard, collaborating with Joseph Areddy SCS (winner of the 2024 Swiss Film Award).

In 2023, she moved to Mexico for a year and a half to further develop her practice alongside members of the AMC, notably its president Alfredo Altamirano. There, she worked on several advertising projects and feature films as operator or second unit cinematographer, and later on the series *Cometierra* (Amazon Prime) as second unit director of photography.

Back in Switzerland, enriched by her experience in Mexico, she now focuses on auteur cinema, both documentary and fiction, driven by a visual approach that is both sensitive and rigorous, inspired by cinematographers Sven Nykvist, Hélène Louvart AFC, and Christian Berger.
